

# 1-day Live Online Training

 (2 - 8)

## Continuous Testing with BuildWise

*Learn with Zhimin Zhan*

**Author**  
of 9 test automation books

**Speaker**  
at intl testing conferences

**Winner**  
of intl software award

**Practical  
Effective  
Hands-on  
Fun!**

# Instructor: Zhimin Zhan

**Author** of 9 books on test automation and Continuous Testing

*Rankings as of 2019-06*

**Speaker** at international software testing conferences, incl. StarWEST

**Winner** of the runner-up prize at 10th Ruby Award (Japan, 2018)

**Creator** of highly acclaimed TestWise and BuildWise

Developing/maintaining automated tests on a daily basis **since 2006**

# Objective

Participants feel confident to set up BuildWise CT server to execute Automated UI/API tests, with the knowledge of:

- 📌 How CT works in a real DevOps process
- 📌 Install and Set up BuildWise CT Server
- 📌 Sequential and Parallel Build setup
- 📌 Best practices to fix failed tests detected in CT
- 📌 Auto-Retry to reduce false alarms
- 📌 Dynamic test execution ordering
- 📌 Delay completion, Manual-rerun, ..., etc

Test scripts used during the training are 100% pure Selenium WebDriver.

# Audience

## Main Audience

-  Test Automation Engineers (SET)
-  Manual Testers
-  Software/DevOps Engineers
-  Managers

As Continuous Testing is essential in Agile/DevOps, others members of a software team will find it useful too:

-  Business Analysts
-  Tech. executives

# Teaching Method

We use Zoom for our Live Online Training.

Training will be delivered in a mixture of the followings:

- 📌 Presentation
- 📌 Video demonstrations
- 📌 Live demonstrations
- 📌 Hands-on exercises, participants set up and manage test executions in CT server, under the instructor's mentoring
- 📌 Q & A

Screen sharing and remote control (in Zoom) are used.

# Proven Content

Zhimin has been conducted CT for clients and his own highly-claimed apps since 2010. He has summarised his experiences into a highly acclaimed book: "[Practical Continuous Testing](#)".

## Test Scripts used

- 📌 100% pure Selenium WebDriver

## CT Skills & Techniques

- 📌 Set up BuildWise CT Server
- 📌 Sequential and Parallel Build setup
- 📌 Auto-Retry to reduce false alarms
- 📌 Dynamic test execution ordering
- 📌 Delay completion, Manual-rerun, ..., etc

# Tools and Material Provided

Software:

**BuildWise Server**  
**BuildWise Agents**

eBook:

Training Slides (PDF)

online bookings

**BONUS**

2 x 3-month  
BuildWise Agent license  
valued at US\$180

*(BuildWise Server is free)*

“Practical Continuous Testing”  
eBook valued at US\$15

# What do you need on the training day?

# Content ^ (highly interactive)

Duration: 8 hours

## Video: Continuous Testing in Action? (~5 min)

- 👤 Run a set of End-2-End tests in CT server

## Introduction

- 👤 Why most CI/CD and DevOps attempts failed?
- 👤 Demystify CI/CD, Continuous Testing & DevOps

## Hands-on (~30 min)

- 👤 Install Ruby, ChromeDriver and test libraries
- 👤 Run tests from command line
- 👤 Set up own BuildWise server (demo) from scratch

## Hands-on (~20 min)

- 👤 Create a new Git repository with selenium tests
- 👤 Create your own new build project and run it!

## CT in Nutshell

- 👤 Build targets
- 👤 Understand CI server's work directory

## Fix a broken build (~30 min)

- 👤 Understand source update (Git)

## Sequential Build practices

- 👤 Custom test execution via Environment Variables
- 👤 Intelligent ordering, ...

## Build Scripts - the Magic

- 👤 Build targets
- 👤 Custom build with Rakefile

## Hands-on (~30 min)

- 👤 Install MySQL server
- 👤 Start BuildWise Server in production mode

## Demo & Hands-on (~45 min)

- 👤 Set up multiple build agents
- 👤 Create a parallel build project, and run it!

## Parallel Build best practices (with Demo)

- 👤 Dynamic ordering
- 👤 Auto & Manual retry

## General CT features (with Demo)

- 👤 Reporting, Notification, Scheduling, Artefacts
- 👤 Traceability Matrix, Execute triggered via Web

## Advice

- 👤 Common CT failures: automation, human & execution
- 👤 How to win CT?
- 👤 Execute tests in other frameworks

## Large scale test automation

- 👤 Set up and grow a build farm

## Q & A

^ the actual content may change to suit attendants

# Provide your info to help us prepare

- ☐ Your machine's OS, Windows or macOS?
- ☐ Your preferred name for complimentary BuildWise Agent License  
*For group booking, please provide names of all participants  
(Online bookings only)*

## Set up a build project to run your own tests in BuildWise\*

- ☐ A small set of automated UI/API tests in following syntax frameworks:  
RSpec, Cucumber, PyTest or Mocha.

*\* this activity only occur when time permits*
